## APR3850

Flush Diaphragm Pressure Transmitter

### FEATURES

- Easy clean flush membrane to prevent clogging
- Thick film sensor technology for long service life
- Pressure ranges to 400 bar
- Range of sanitary grade pressure fittings
- Integral O-ring seal to ensure flush pressure seal

### SPECIFICATIONS

The APR3850 pressure transmitter has been designed to meet the requirements of the majority of industrial pressure measurement applications where a hygienic flush diaphragm connection is required. Robustly constructed from stainless steel this range of pressure transmitters incorporates the latest strain gauge technology together with a custom IC amplifier offering excellent stability and accuracy over a long service life. This transmitter is particularly suitable for use with high viscosity materials. The flushmembrane can be easily cleaned for long term reliability and outstanding performance.

ATEX and IECEx approval and protection by intrinsic safety is optional and intended for installation and operation in zone 0, gas group IIC, temperature class T4 and zone 20 dust and M1 mining.

#### Typical applications include:

- Food processin
- Pharmaceutical
- Petrochemical
- Waste water
- Slurry handling
